

EZ RF™ — Mobilizing Your Oracle Investment

BullsEye's EZ RF software runs on handheld barcode and RFID scanners, allowing users to query information (such as Inventory Lookups) and process Oracle transactions (like PO Receiving, Inventory Movements, Cycle Counts, Picking/Shipping, etc.) from anywhere in — or beyond — the warehouse.

- Simplify inventory, production and supply chain processes, while gaining real-time Oracle visibility throughout your business
- Streamline your business with the speed and accuracy of barcodes and RFID
- Business-specific workflows save time and money
- Simplified transactions boost user acceptance
- Real-time and Offline modes capture data anytime, anywhere
- Full integration with Oracle E-Business Suite ensures reliability
- Single-vendor solution: EZ RF software, best-of-breed hardware, and project planning expertise.

EZ RF™ — Making Oracle Work for You
